+

zotero

Zotero? Bibliographical tool that can be used collectively.

Zotero Library “Fediverse Research”

https://www.zotero.org/groups/5490166/fediverse_research/

focussing on academic research papers, incl. software and occasional journalistic items, e.g. on the Gab invasion, interviews with key actors, opeds.

On the Fediverse in the widest sense, **3 x decentralised**: federated, P2P, blockchain. But not including research on **platform capitalism** etc. to which it is an alternative.

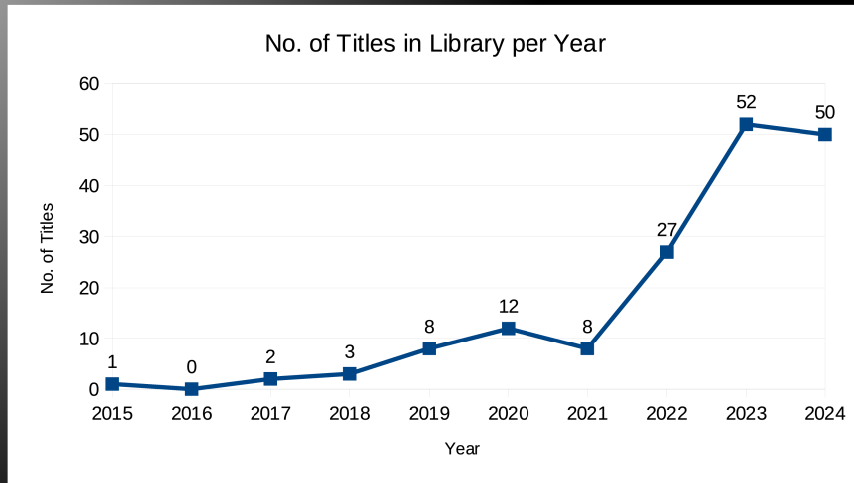

Not exhaustive but with currently more than 200 items, a good overview.

The corpus can be sorted by various columns in the middle and by tags in the left column. You can import tags from the source and from keywords, which might be folksonomies or disciplinary tags from various national standards. Decided to do my own, makes sense mostly is arbitrary at the edges, hard to main collectively.

Automatable methods would be preferred.

You can attach a colour to a tag which 1makes it stand out. **10 members** in group = active contributors.

Number of Titles in FediLibrary per year

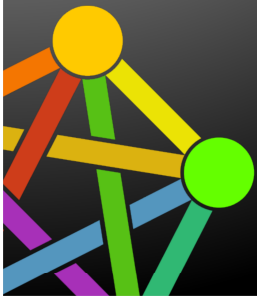

176 of 204 items are dated. The remaining are software projects or undated websites like IFTAS or Public Stack.

Research takes off since only 2 years with more than 50 papers per year.

Disciplines

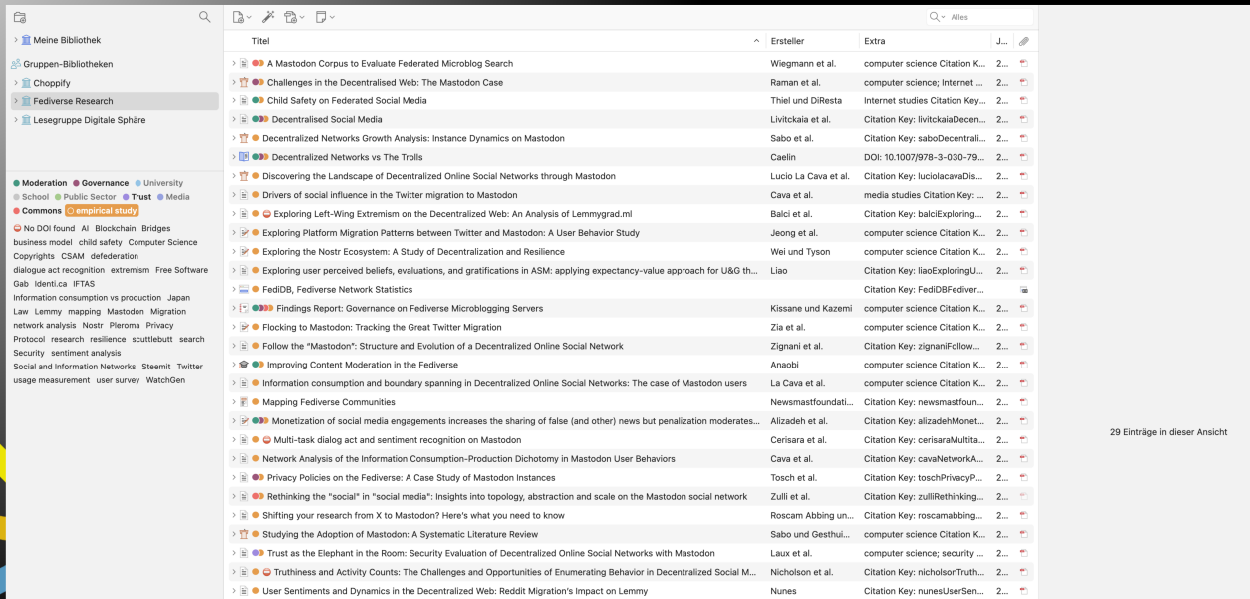

| | |
|---|--|
| Computer Science | |
| media studies | |
| Law | |
| Internet studies | |
| communication studies | |
| data protection | |
| accounting, economics, engineering, environmental science, food science, health, political science, psychology, sociology, sports science, urban planning, visual arts, writing | |
| journalism | |
| | |

not easy to identify from journal title or author's institute or the chaos of tags on items.

Computer science (physics, mathematics) are clearly dominant. media and Internet studies are quite active, so is law and data protection.

Empirical Studies (quanti & quali)

The screenshot shows a library catalog search results page. The search term is 'empirical study'. The results are displayed in a table with columns for 'Titel', 'Ersteller', 'Extra', and 'J.'. The table contains 29 entries, each with a title, author(s), and a citation key. The entries are listed in descending order of relevance. The first entry is 'A Mastodon Corpus to Evaluate Federated Microblog Search' by Wiegmann et al. The last entry is 'User Sentiments and Dynamics in the Decentralized Web: Reddit Migration's Impact on Lemmy' by Nunes.

29/203 = 14% are empirical studies, mostly data but also interviews.
makes for pretty illustrations:

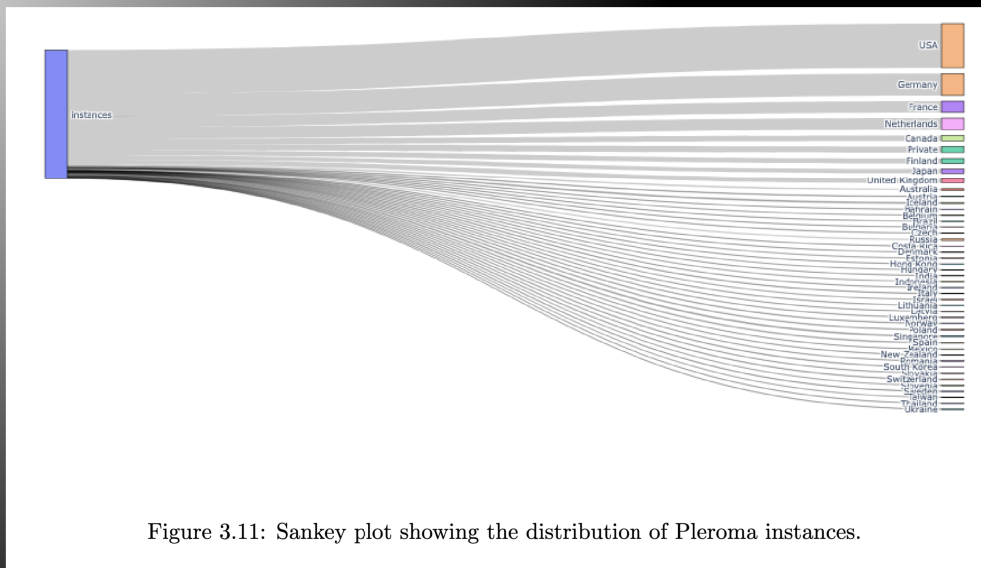

Figure 3.11: Sankey plot showing the distribution of Pleroma instances.

I.H. Anaobi, Improving Content Moderation in the Fediverse, 2024

Number of Pleroma instances in different countries
(US, DE, FR, NL, CA)

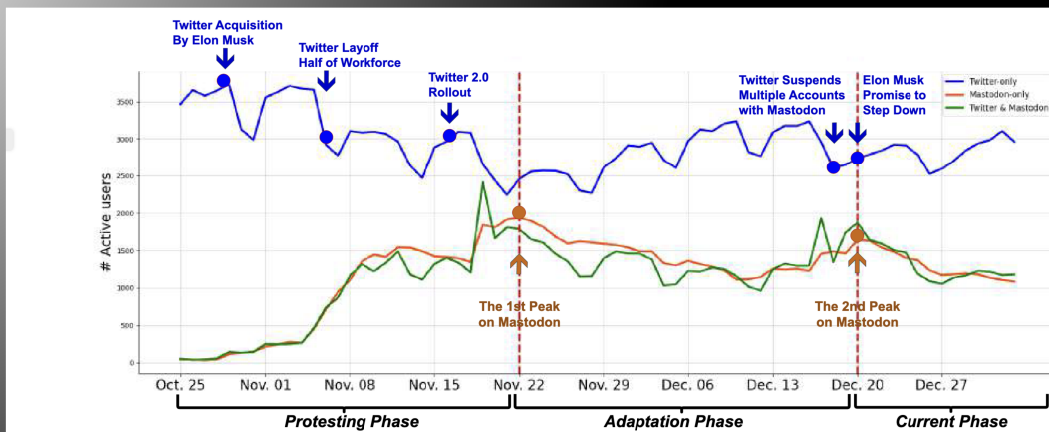

Figure 5: Trends in daily active users tagged with major events. Twitter-only (blue) and Mastodon-only (orange) lines indicate the number of users active exclusively on one platform, while Twitter & Mastodon (green) represents users active on both platforms. The x -axis denotes a particular date t_j , when we assess whether a user was active within the past one day. Red dashed lines highlight the key moments, where the temporal shifts overlap among the three trends (blue, orange, and green)

Jeong et al., Exploring Platform Migration Patterns between Twitter and Mastodon: A User Behavior Study, 2024

the events at Twitter and Mastodon during those tumultuous 3 months at the end of 2022.

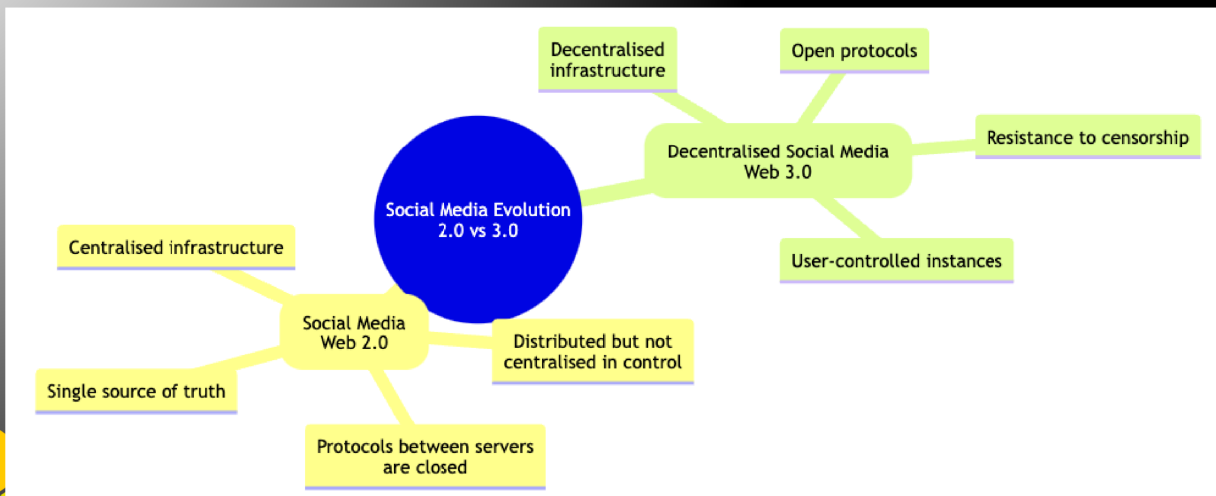

Figure 3: Social media evolution: Web 2.0 vs Web 3.0*

Ellul et al. 2024, Decentralised Social Media, EU Blockchain Observatory

conceptual ideas, e.g. the shift from Web 2.0 to 3.0

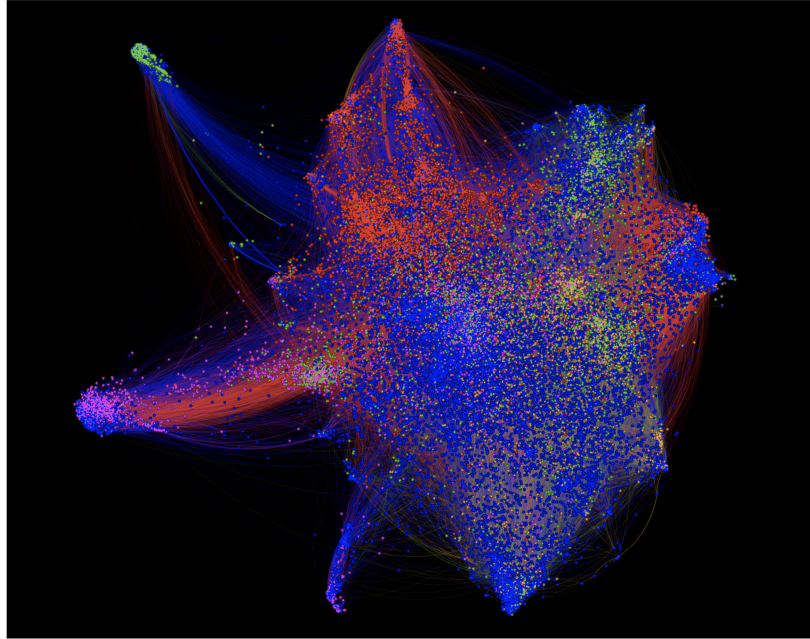

Figure 3: Illustration of the inter-instance subnetwork. Nodes correspond to users belonging to the instances composing the top-5 instance merged network and only inter-instance edges are drawn. Nodes are colored according to their membership instances, i.e., *mastodon.social* (blue), *pawoo.net* (red), *mastodon.xyz* (green), *mstdn.io* (magenta), and *octodon.social* (orange). The color of an edge corresponds to the color of the source instance. The displayed layout is based on the force-directed drawing *ForceAtlas2* model. (Produced by using the *Graphistry* service, available at <https://www.graphistry.com>.)

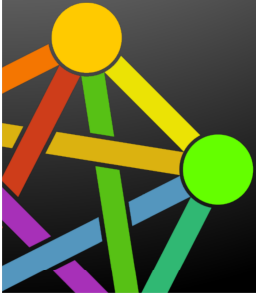

Cava & Tagarelli 2022

Information Consumption and Boundary Spanning in Decentralized Online Social Networks: the case of Mastodon Users

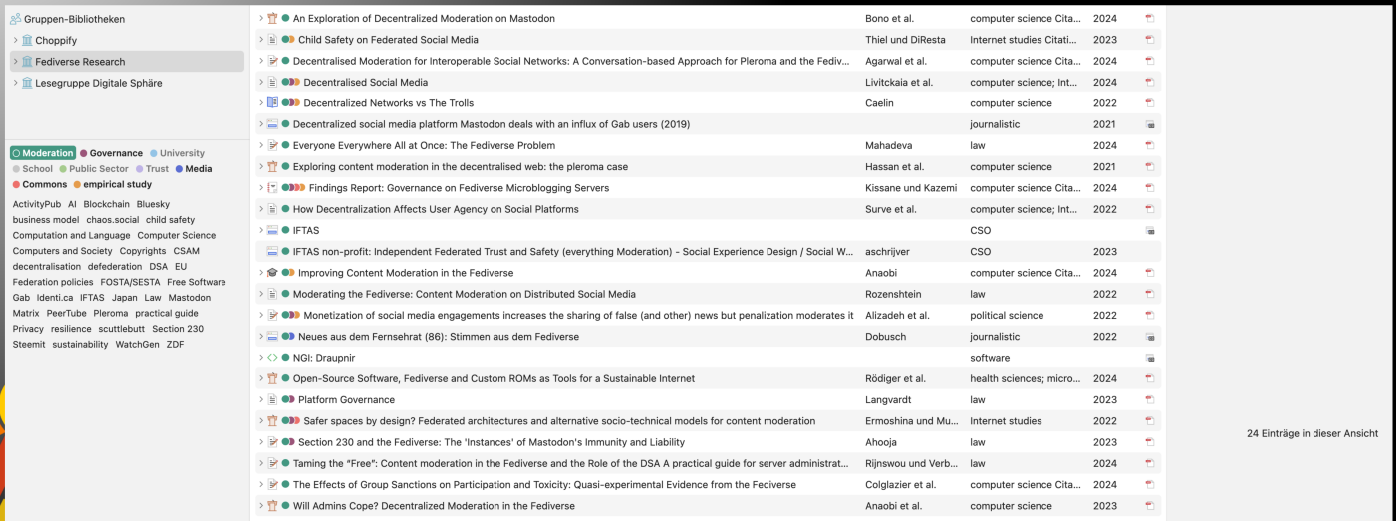

and outright psychedelic stuff; decoration for party space. Actually, the inter-instance connections on the top-5 Mastodon instances.

Thematic Clusters

- Moderation
- Governance
- Trust
- Commons

IFTAS Federated Trust and Safety, CSO based in N.Y. Moderator Community & Moderation-as-a-Service. Emelia should have told us about it.

Moderation & Governance

Findings Report: Governance on Fediverse Microblogging Servers

[Erin Kissane](#) and [Darius Kazemi](#) with the support of the [Digital Infrastructure Insights Fund](#)

Correspondence: fediversaistpapers@gmail.com

August 20, 2024

[\[PDF version\]](#) / [web version](#)

[\[Quick-Start Guide to Fediverse Governance Decisions\]](#)

[\[Fediverse Governance Opportunities for Funders & Developers\]](#)

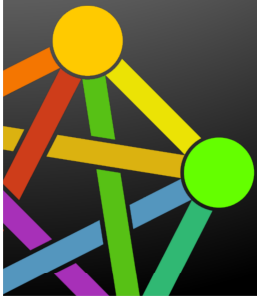

Project Introduction

We proposed this project in the fall of 2023 based on our shared sense that the Fediverse's history of resilience and expansion positions it as one of our best chances to allow more people to **maintain strong social connections online while escaping the behavioral manipulation, pervasive surveillance, and capricious governance** that characterizes large-scale centralized social platforms.

Initial research question: "What are the most effective governance and administration models/structures in place on [medium-to-large sized Fediverse servers](#), and what infrastructural gaps (human and digital) persist?"

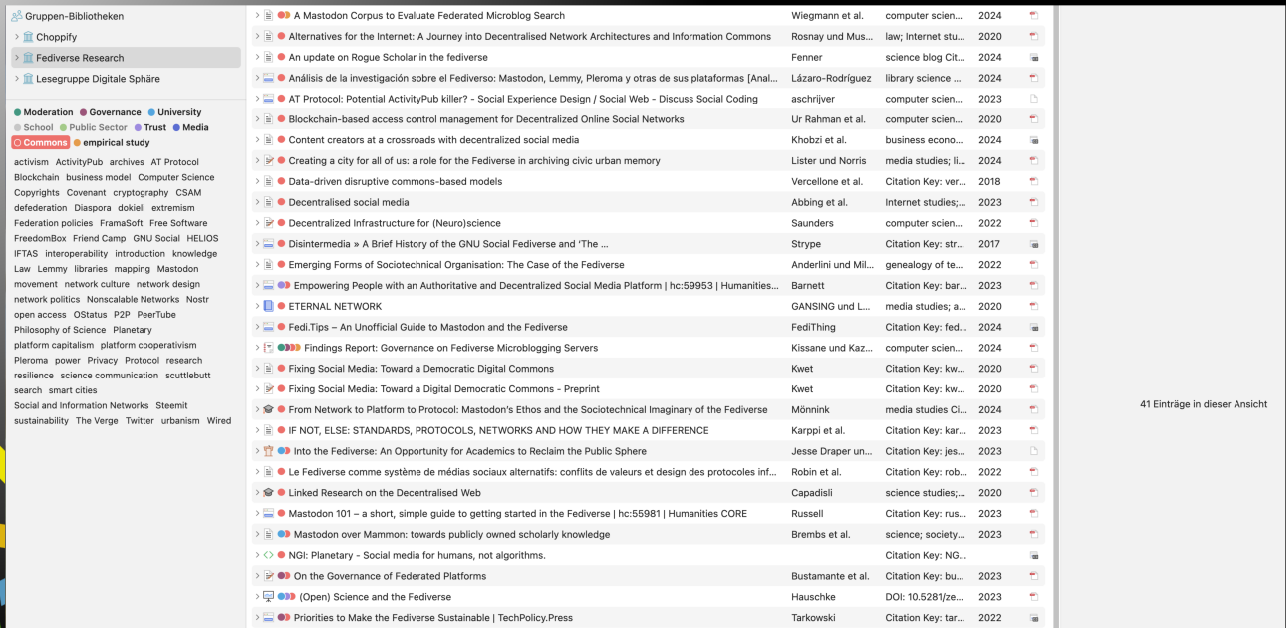

Our rationale at the project's outset: "The Fediverse's rapid expansion brings both opportunities and multifaceted risks. Our research seeks to identify current server administrators' most promising models for mitigating those risks and outline the biggest and most important gaps in risk mitigation, with the aim of helping the broader Fediverse level up governance quickly, safely, and collaboratively."

[Kissane & Kazemi, Findings Report: Governance on Fediverse Microblogging Servers, 2024](#)

I found particularly useful for scholars and practitioners alike.

Commons

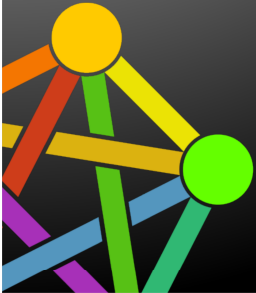

The screenshot displays the Commons interface. On the left, a sidebar contains navigation options such as 'Gruppen-Bibliotheken', 'Chopphy', 'Fediverse Research', and 'Lesegruppe Digitale Spiäre'. Below these are categories like 'Moderation', 'Governance', and 'University'. The main content area shows a list of articles with columns for title, author, subject, and year. The right side of the interface indicates '41 Einträge in dieser Ansicht'.

the 'sociotechnical imaginary' of the Fediverse comes from science, Internet, library as Commons: collective ownership and control, disintermediation, empowering people, building ethical, democratic, sustainable sociotechnical spaces.

Uni (10) / libraries / schools (2): Internet invented by academics, replied to journal crisis with Open Access movement. Now: for-profit academic SNs of Big Publishers/Tech (**Academia.edu** (startup of British entrepreneur Richard Price), **ResearchGate** (also venture capital funded, incl. Peter Thiel & Bill Gates), SSRN (academically founded, acquired by Elsevier). New wave of Open Science on the Fediverse: activism. Reclaim the public sphere / Digital Sovereignty / public owned scholarly knowledge, Commons.

Data protection officers in DE & EU were first to establish Fedi-instances for the public sector (9).

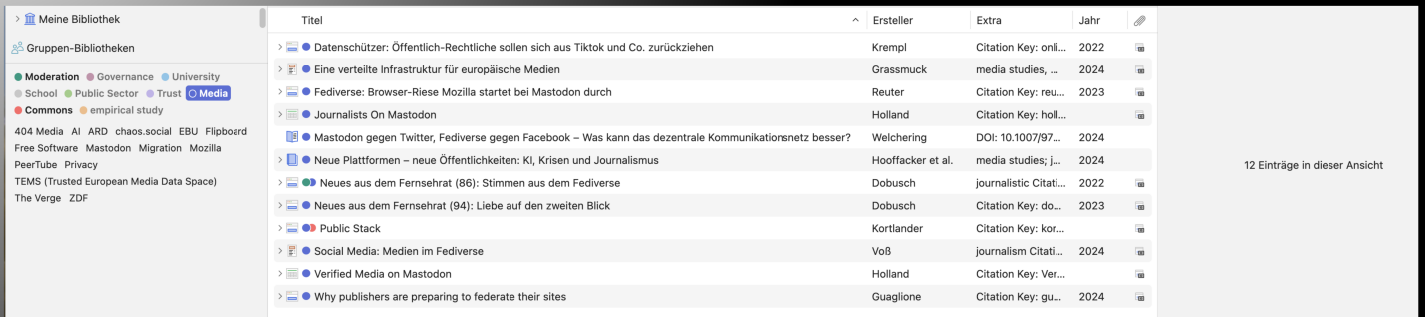

Public Sector

**Doch ganz schön
was los hier.**

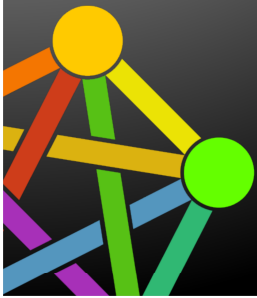

After BMBF decided to leave, it was overwhelmed by community responses and **announced** on Wednesday that it will stay.

Media

The screenshot shows a library catalog interface with a sidebar on the left and a main list of items. The sidebar includes categories like 'Moderation', 'Governance', 'University', 'School', 'Public Sector', 'Trust', 'Media', and 'Commons'. The main list contains 12 entries with columns for 'Titel', 'Ersteller', 'Extra', and 'Jahr'. The entries are as follows:

Lists of journalists and media organisation on Mastodon by Heise-journalist Martin Holland, future of journalism in the age of platforms and AI, PSM: Leonard Dobusch, the first member of a Broadcast Council (ZDF) to publicly and regularly report, future of media: 404 Media, Flipboard, The Verge but also: DisplayEurope.eu...

Media

The image shows a composite of three elements related to Display Europe. On the left is a screenshot of the website's main page, featuring a search bar, a navigation menu with 'Sources' and 'Languages', and two news articles. The first article is titled 'Fleeing war, finding exploitation: Ukraine's refugees in Europe' and is dated 4 September, 2024. The second article is 'Hand in hand, Twitter/X and the far-right are unravelling our social fabric'. In the center is a Mastodon profile for 'displayeurope.social', which is described as a decentralized social network. It lists the administrator as Jonas Lie (@fairamicus) and shows 8 active profiles. On the right is a screenshot of the 'Social Display Europe' account on Mastodon, showing the profile name, handle (@social@dispayeurope.social), a bio stating it is a ground-breaking media platform, and statistics: 87 posts, 95 followers, and 167 followers.

DisplayEurope.eu

Display: EU-funded federated platform initiated from pan-European networks of community media around CBA.

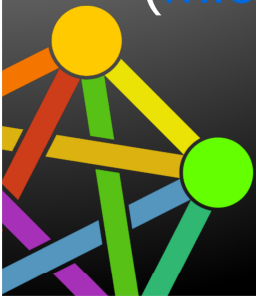

PSM were pioneers (Böhmermann) in entering the Fediverse, now in leaving it (Caren Miosga 20.8.24)

Im Anschluss: André Kroll, was ARD macht.

Fediverse 2.0

- “Fediverse 2.0, which is well underway - and much more exciting. That’s the Fediverse as a hub connecting multiple platforms: Wordpress, Flipboard, Ghost – and of course Threads.”

([Michael Foster 04.09.2024](#))

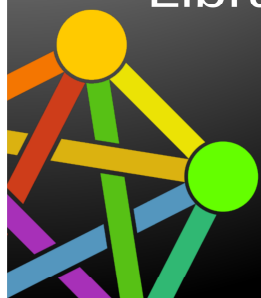

and Bluesky (in BR + 3 mio)

... and other ideas on the future of the Fediverse –
which will be bright and glorious!

Conclusions

- May the Fediverse Research Library be useful to scholars, researchers, journalists and all else.
- Whoever wants to actively contribute to the Library is welcome

I hope the same for the FRL.

Thank you!
